

Nakanihon

Automatic Calculation & Positioning
Curtain Pleat Sewing

NCT-250ENC/SA3

Data input can be performed easily by a new type color liquid crystal panel.

This machine equipped with "Pattern Match Sewing".

Automatic Operation

Beautiful & Exact Pleating

Compact Design

☆Simple Operation

The operational function has been improved more than a conventional machine.

This machine allows completely automated operation, except the start and finish sets.

It also allows full automation in finish width adjustment for the final three pleats.

While the machine is in operation, you can input next data or measure the original width of the next product, which will improve the operating efficiency of the machine.

Hands off operation is possible thanks to the special cloth control roller and cloth feeder.

One operator can use 2 stations. Tasks such as hooking, picking threads, and product folding can be efficiently performed even with 1 station.

Model Name	NCT-250ENC / SA-3					
Number of Fold	1 fold		2 fold		3 fold	
Necessary Pleat Width	25	~ 70	46	~ 130	60	~ 165
Hook Distance	125 - 235	100 - 220	115 - 230	70 - 190	105 - 225	55 - 170
Machine Head	AMS210EN Max. Sewing Speed 2800rpm					
Voltage and Electric Power	3-phase 200V : 550W					
Air Pressure / Power Consumption	5kgf/cm ² 1HP(option)					
Dimensions	1520mm(w) x 1200mm(d) x 1130mm(h)
