

For ready-made curtain

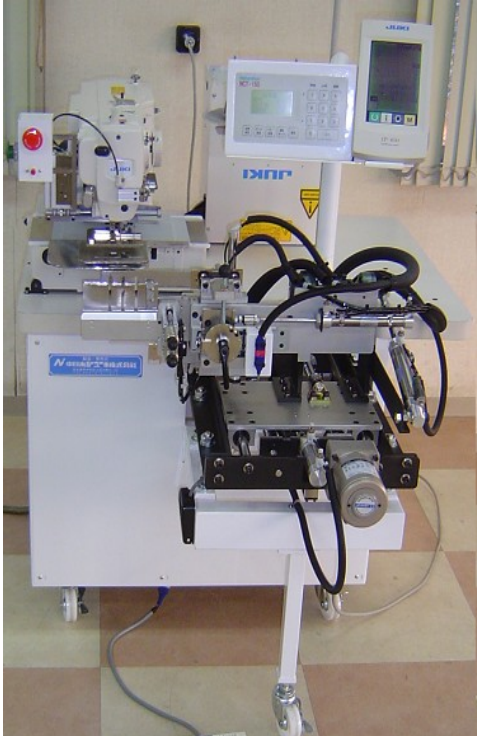

NCT-150

Auto calculation and folding position

Automatic Pleats Sewing Machine

- Pleats sewing for ready-made curtain is lovely stitched in specified dimension.
- Hook distance, yardage of pleats are automatically calculated through simple interactive input of required such data as (original width, finish width, number of pleats group, and of pleats) with troublesome stitching condition setting.
- cycle time for pleats sewing can be speeded up and high productivity is realized.

USELESS SKILL HI-PRODUCTIVITY

MAJOR FEATURES

- ◇ Stitching condition is confirmed by executing trial operation in fitting function mode. Only you have to do is to adjust folding depth dial at displayed folding depth amount after inputting remaining cloth width and finish width when optimum folding depth is required.
- ◇ You can call required program number and save data input time by memorizing the setting condition.
- ◇ Pleats sewing and tacking are stitched at the same time and moreover optimum dimension pattern is automatically called and stitched according to pleats height.
- ◇ Edge stitch setting is possible together with tacking setting. Tacking is automatically eliminated and changed to edge stitching pattern when edge stitching starts.
- ◇ Direct motor with electronics cycle machine having maximum rotational speed as high as 2,500 stitches and raising amount of presser as 3 cm is equipped.

SPECIFICATION

Model name	NCT-150
Hook distance	8cm to 19cm ※
2 Fold necessary size	4.5cm to 11cm ※
3 Fold necessary size	6.5cm to 16cm ※
Pleat height	3cm ※
Use sewing machine	JUKI AMS-210E
Voltage	Single phase220V/Three-phase380V
Consumption electric power	750W
Air pressure	5kgf/cm ²
Installed size	1200mm(w) × 1000mm(d)

※ A capable value might change into the above-mentioned, set value depending on a cloth characteristic and pleats necessary size.
